- Total Budgeted Revenue = \$14,491,203, a 5.43% increase over prior year's budget
- Total Budgeted Expenditures = \$13,965,225, a 4.56% increase over prior year's budget
- Net Change in Fund Balance = \$525,978
- Estimated Ending Fund Balance as of June 30, 2025 = \$9,470,083

Budget Background

Creating a school district budget is nearly a year-long process that begins in November and December when the Board of Education passes a levy and culminates in the budget adoption in September. In the intervening months, District administrators plan for the succeeding school year through the lens of the District's mission, vision, and strategic plan. Staffing, contracted service providers, and key instructional objectives are just some of the major priorities that are balanced in the budgeting process. The Board of Education will review a preliminary budget in the month of May. Over the summer months, District administration will continue to gather data on expected revenues and expenditures and make adjustments to the preliminary budget when necessary. In August, a tentative budget is reviewed by the Board and put on display in the District AO and

on the website for the required 30 days. Following the display period, the budget is adopted after a public hearing.

For the fiscal year 2025 budget, the vast majority of revenue will come from local property taxes. This source of revenue increased significantly over the prior year due to the maximum multiplier of 105% being added to the tax extension, due to a decades-high consumer price index (CPI). Other revenue sources from the state and federal governments increased as well. The District's earnings on investments are expected to be higher than normal due to high interest rates, and this will hopefully counteract the impact of lower amounts of corporate personal property replacement tax (CPPRT) than the District received in prior fiscal years.

On the expenditure side, as 60% of budgeted expenses are for salaries and benefits of the District's staff, the newly negotiated collective bargaining agreement with the Roselle Educators' Association (REA) dictates the agreed upon increases in spending in these two areas. Decades-high levels of inflation from the past years continue to drive up costs for professional services and supplies/equipment. The District is also taking on a significant increase in the costs it incurs from NDSEC to provide the optimal educational experience for its most vulnerable learners.

This budget is strategically constructed to put the District on good footing financially for years to come. The Board of Education has identified significant capital projects it would like completed in the next several years. This budget allows for the Board to take a portion of the annual revenue and invest it in these future projects. Resulting from the solar project the District completed in 2022-2023, the District anticipates approximately \$415,000 in funds in the form of renewable energy credits from ComEd and incentives from the federal Inflation Reduction Act. This money will be deposited in the District's capital projects fund in anticipation of future projects. This means the District will be in a position to take on less debt in order to pay for these projects which minimizes the burden on the taxpayer.

In summary, the goal of the budgeting process is to provide for the needs of every student the district serves while respecting the dollars the community invests in their schools. The District has been ending the fiscal year with a surplus since 2018 and there is optimism that, with careful planning and fiscal responsibility, this trend will continue with the FY 2025 budget.
